

## NEW PARTS

### BERETTA MAG WELL

Available in black only...\$50

- Remove the hammer spring cap on the bottom of the grip. If you have a lanyard, you will need a different plug. (Plugs are available from EGW drilled and tapped for \$10.)
- The mag well fits side-to-side with a .025 overhang on the sides. Make sure it slides on your frame and check the fit without the plug in place. (The plug sometimes hangs down a few thousands.)
- After you make sure it fits your frame, (1.024 is the width of the opening), start the 6-32 button head screw (provided) into the plug and slide the well on from the side to the center.
- The unique attachment requires only the opening for the Allen wrench through the bottom hole in the well.
- Clean and sturdy.

### EGW'S NEW 4 CAL CHAMBER CHECKER

Anodized black....\$20

- We start with a block of Aircraft 6061 T6 aluminum. Some companies use boring bars to make chamber checkers, we use the actual Clymer reamers we chamber barrels with. The 4 checks are 9mm 38 super 40S&W and 45 acp.

### STI SV STEEL MAIN SPRING HOUSING

Price...\$40

- Steel and Stainless steel checkered and checkered well main spring housing helps get the weight in the right place and gives you good traction.

### AR FWD ASSIST PLUG

Price...\$10

- Anodized for long life, matted to match most upper., For use on Competition AR's that do not use the forward assist any longer.

### EGW WHITLEY SPACE STOCK BUTT ROD

Price...\$35

- Numbered for reference to return the same each time. Top lined so you can repeat the exact location in length and twist for consistent set-ups.

### TI SHORT MAIN SPRING HOUSING CAP

Cap...\$13

Also available:

Ti Strut ...\$12

Drill Rod Pin Set ...\$15

SS Firing Pin...\$10

- Short tail to keep it light. Made from 6Al4V Titanium. Gets the hammer speed up – works great with our Ti Strut .
- Try our high quality drill rod pin sets. Made from drill rod, not leaded screw machine stock, like the others.
- Use our stainless steel firing pin. Remember, using Ti for firing pins reduces the force of the hit by 40%, promoting primer flow.

### KIDD BLAST SHIELD FOR C-MORE

Price...\$49.99

- EGW is honored to make the blast shield for Kid Innovative Design. EGW buys them back packaged to offer for sale.

# SPECIALS AND PACKAGES

## BOMAR PACKAGE

### Prep and Reblue your Slide...\$225

We will need to know that your gun is presently sighted in, so that we can maintain the relationship from the front sight to the rear sight.

### Add a flat top for...\$35.

- Send us your slide and save a fortune on UPS. Slides are not guns and do not need to be shipped next day air.
- EGW will cut your slide for a Bomar rear sight. Bomar – made in the USA – the original that holds up well.
- EGW dovetail front sight, standard in your choice of width's from .100 to .125 and in your choice of styles improved ramp post (straight up and down or undercut profile).
- Or you can have an EGW fiber optic front sight at no extra charge.

## FIXED SIGHTS

### Sight installed and Reblue your slide...\$175

- We will need to know that your gun is sighted in before we can do this work, or you will need to send the entire gun.
- Novak or Heinie rear sight melted into the slide. (You can have the Heinie in the Novak cut.) EGW Dovetail front sight installed or fiber optic front sight installed and reblue your slide

## THREAD YOUR AR BARREL

Send your upper...\$60

Send your barrel...\$30

Flash hider with peel washer...\$10

## E TREAT...\$225

- The final word in black finishes. Not a paint, not bluing – a treatment.

## EGW CHECKERING

- We checker every 6 weeks and EGW offers many choices when it comes to front straps. We checker for 30 dealers around the country.
- You have a choice of lines per inch.
  - 20 lines is course, best for people who work with their hands.
  - 25 lines per inch - EGW started offering this about 11 years ago. It is a good compromise between course and fine.
  - 30 lines per inch is much finer and easier on the hands.

**MACHINE CHECKER FRONT STRAP - STANDARD CUT .....\$160  
(20, 25, OR 30 LPI)**

**MACHINE CHECKER FRONT STRAP - HI CUT .....\$200  
(20, 25, OR 30 LPI)**

**RELIEVE THE TOP .....\$20**

- How high do you want to checker your front strap? A standard issue series 70 colt is what we call our standard height.
- Hi cut comes straight off the back of the trigger guard to the top of the radius we put on the front strap.
- The top line dress-out is important if you want the top line of checkering to stick out from the frame. We had a special relief cutter ground to do a super clean job of this.

HI CUT CHECKER WITH RELIEF CUT AT TOP

HI CUT CHECKER WITHOUT RELIEF CUT

## BORDER BOTTOM...NO CHARGE

- We can run the checkering right off the bottom on a thick front strap. If your gun is on the thin side or has a factory mag well, you may want to leave a border on the bottom – the last 4 rows are smooth. This is also great for inside a jacket as the bottom does not destroy the liner.

BORDER BOTTOM
